

Hi Jessie,

You know, it's nice to see a company follow up on their product. I have use the Safe Rust Remover over and over on a lot of small parts. Fantastic product, the best thing I use it on was a set of ralley wheels that I thought were going to never get cleaned up. I use the rust remover on it and presto. Turned out great. I am very happy with the service and the product. I have told everybody I know about this product and shown them how it works, that's the best part, people that are in doubt about it, that say it will never work. I like to prove people wrong sometimes.

Well, I would like to say thank you again for that great product, and I will be ordering more here with in the near future.

THANK YOU

-----  
Hello,

I am really impressed and pleased with your products!

I have an octagon picnic table that sat under a maple tree, from all the rain we have been having it had green mold growing on it. I purchased and used a special wash for wood and scrubbed it ,but I still had green mold.

I took some of your Ultra One degreaser and sprayed it on the table, I let it set for 10 minutes and scrubbed the table Wow, what a difference, it looks like the day I bought it. Needless to say the table no longer sets under that maple tree, I am amazed every time I look at it, I love wood and it just looks great.

I used your safest rust remover on a metal vent I had outside of my house that needed repainting and was also very rusty, the rust came off life nothing which was great and saved me a lot of work. The construction people working on my house were amazed at how well and actually how quickly the rust came off, I soaked it overnight.

You have some awesome products, no strong smells, I don't have to wear protect clothing and to boot they work better than all the other products I have tried out on the market.

I can't wait to use these products on other household items.

Sincerely  
Denise Pritts

Dear Sales @ Ultra One,

My husband recently purchased SafestRustRemover product and a gallon of each of your degreasers you make after reading a testimonial on one of his auto resto sites about these products. My husband was so impressed with all your stuff that was all he talked about at diner for two nites straight. I told him I would let him know if your cleaners were any good after being burned by so many television informercial products repeatedly that I had purchased thank God for half the price when they were now being sold at Walmart instead of the expensive informercial price. First I read all your claims about strong enough to clean the lincoln tunnel and safe enough to wash your hands in ,plus all your instructions which my husband never reads.

Well let me tell you something, I've got worse dirt then the Lincoln tunnel has on certain days when my husband tracks thru my house after working out in the garge or out on our farm all day and night, now I know what he was carrying on about. I cleaned everything testing out your G-5 product which I really love and your Ultra One Heavy Duty degreaser used full strength and also diluted , I can now throw out everything else under my kitchen and bathroom sinks that all work like crap when compared to you. I have never seen anything look like water and not have any real smell to it that does what you do. We got things clean that we did not know the real color of until you came along, plus I also cannot believe how well you can remove all different types of smells and odors so completely with this stuff, plus I did not need gloves or a gas mask to use these products.

I need to tell you one more thing I am sure you don't know about your product, I get poison Ivy on my hands allot around the farm here ,while using your G-5 to clean the outside of our RV which nothing else worked as well getting the black streaks off as you did, I had the G-5 in contact with my skin allot, my poison ivy no longer itched and I found relief in spraying it on when the itching came back a day later. I continued this for the next few days and it all dried up and healed faster then the Benadryl I have always used, maybe you should give it to the poison Ivy companies for testing, my sister is now dabbing it on her acne pimples and said it is drying them out and clearing up her oily skin faster then anything else she has ever tried.

You guys are the real deal and I have told many of my girl friends about this stuff, the price is way to high for walmart prices, but you are worth every dime that you charge and allot more when I get poison Ivy again. You need to get this stuff in the stores some how so people can get a real product that does what it says. I will order online again and again even if you don't put it in the stores, for once my husband knew what he was talking about, thanks for inventing the best cleaners I have ever used.

PS I'll be back!!!

Thank you for a great product,

Linda Zetterberg

OK, I am floored. Someone on the HAMB message board (for traditional hot rodding) post a link to your website. I watched your video. I am amazed.

Please convince me this is not fake! I have a 63 Impala that I have been trying to decide the best way to remove the rust, and if your stuff works like you claim, I believe I have found it. I work at a power plant currently and manage our environmental programs on site. How does the EPA classify your product? Even if hazardous, the fact that you can reuse is a big plus because you could keep it labelled as Usable Product until it was no longer effective. How long can you reuse it. I am excited to learn more about this for my own Impala, but even moreso to find out more about becoming a dealer/user. Please send more information ASAP!

Regards,

Shane Van Wey

Do you sell the Heavy Duty Degreaser to the retail public?

I would be interested in the small spray bottle, or a gallon size bottle.

We received a sample bottle of it with the rust remover we ordered last year. We used the degreaser this weekend on my wife's red Ducati motorcycle rims and it worked GREAT! It removed the road grime from riding in the rain, the axle grease fling off, and the smashed and baked on bugs all very easily. I reviewed the product on our motorcycle web forum to let everyone else know what a good job it did. Here is a link if you are interested.

Jessie,

I found your product using google and I think I went directly to your site. I am not sure how exactly that I found your site, I was just doing a search on how to remove rust. I used the product to remove the rust from the inside of the gas tank of my RM125 Suzuki MX dirt bike. The bike is a 1975 model and has sat for several years (about 5-8). When I looked into the gas tank, I was shocked on the amount of rust that was in the tank. I tried several things to remove it, but your product is the only thing that worked! After filling the tank with your product and letting it soak for over night, I was amazed that all of the rust was gone. It looked like a new tank inside! When I first decided to get my MX bike running and looked inside the gas tank, I thought I might never be able get it running again without buying a new gas tank, but your product made it possible for me to clean all the rust from the tank so I could keep the original tank and get my RM125 MX running again. THANKS!

Paul

Hello,

I wrote you earlier and told you about Ultra One's G-5 on my octagon picnic table and what a GREAT job it did. And I told you I was going to try your products on other things around my house... I cleaned my basement one day and mopped the entire concrete floor with the Heavy Duty Degreaser. I went upstairs when finished and when my central air kicked on, this really nice fresh air smell was coming out the duck work. I was amazed and delighted at the wonderful clean fresh air smell in my house that I never have experienced from my basement before.

I have been sharing your products with most of my neighbors and they all ask where they can get it from.

Just had to share.

Great Stuff!!

Denise

Hello Jessie,

I am working on a model A Ford chassis that is pretty rusty. I was looking on google for a rust remover instead of doing more sandblasting. Your slide show looked pretty good so I gave Ultra One a try. It works like it shows, no complaints.  
Thanks

Steven.
